# How to Reheat Your Fully Cooked Turkey From Miles Farmers Market

Your free range turkey has been oven roasted to an internal temperature of 180°F. Our chef has taken readings at the breast, thigh & leg joint. All turkey meat, including any that remains pink is safe for consumption when you reheat it to 165°F.

To reheat your turkey you will pour the broth over it & cover. Place it in a 350°F preheated oven for 40 minutes or until hot.

**Enjoy your turkey & thank you for choosing  
Miles Farmers Market.**
